Felix Royson A

Computer Science Student | Security Engineer

+91 7418915689 felixroys2004@gmail.com GitHub LinkedIn Portfolio

Thoothukudi, Tamil Nadu

Summary

M.Tech. Computer Science and Engineering (Integrated) student focused on cybersecurity, security engineering, and intelligent application development. Hands-on project experience in developing security-focused applications and AI-powered solutions, with foundational knowledge of vulnerability assessment, web application security, networking, Python, and security monitoring. Interested in designing secure, reliable systems and applying intelligent technologies to real-world security challenges.

Education

Erode Sengunthar Engineering College - Perundurai, Tamil Nadu
Integrated M.Tech. in Computer Science and Engineering
2022 – 2027 | CGPA: 8.09 (up to 8th Semester)

Daniel Thomas Matric Higher Secondary School
Higher Secondary Certificate (HSC) - 76.1%
Secondary School Leaving Certificate (SSLC) - 63.6%
2019 – 2022

Technical Skills

- **Cybersecurity Tools & SIEM:** Nmap, Burp Suite, Wireshark, Metasploit, Wazuh, Splunk
- **Cybersecurity:** Vulnerability Assessment, Web Application Security
- **Networking:** TCP/IP, DNS, Routing, HTTP/HTTPS
- **Security Monitoring:** Log Analysis, Alert Triage, Security Monitoring, Incident Investigation
- **Programming & Scripting:** Python (Basic Scripting)
- **Web Development:** React.js, TypeScript, Node.js, Express.js
- **Database Management:** MongoDB, Supabase, SQLite
- **Operating Systems:** Linux, Windows
- **Version Control:** Git, GitHub

Internship Experience

- **SOC Intern — TriosCyber I Virtual** • TriosCyber • Erinth Sep 2026 – Oct 2026
  - Completed a task-based Security Operations Center internship program.
  - Learned security monitoring, log analysis, alert triage, and incident investigation fundamentals.
  - **Tools & Frameworks:** Wazuh, Splunk, MITRE ATT&CK.

Projects

- **S.H.I.E.L.D - Secure Handover Integrity, Evidence, Logging and Delegation** June 2026 - NIL
  - Developing an unrooted Android DPC-based security framework for protecting sensitive applications and data during temporary device handovers. Implemented application isolation, USB restrictions, TEE-backed cryptographic key management, remote emergency lockdown, and security audit logging.
  - **Tech Stack:** Android Studio, Kotlin Jetpack Compose, Android Device Policy Controller (DPC)
- **LANDGUARD AI - AI Powered Landslide Risk Monitoring & Early-Warning System** • Github Sep 2026 - NIL
  - Developing an AI-powered landslide risk monitoring platform using satellite imagery, rainfall, terrain and soil data to identify vulnerable zones and generate early warnings. Built an interactive React-Leaflet GIS dashboard with automated risk alerts and GPS-enabled field reporting.
  - **Tech Stack:** Python, LightGBM, XGBoost, React, TypeScript, Leaflet, GIS.
- **F.A.S.A - File Automation and Security Assistance** • Github Feb 2026 - Apr 2026
  - Developed a secure file analysis and automation platform to monitor and organize system files. Implemented automated file scanning and structured categorization to improve file management and visibility. Designed an interactive web interface for analyzing file metadata and system storage patterns. Built using a modular and scalable architecture to demonstrate security-focused system design principles.
  - **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Multer, Git & GitHub.

- **SOC-X - Security Operation Center Extreme** • Github July 2025 - Aug 2025
  - Developed a centralized SOC simulation platform for monitoring and analyzing security events, featuring multi-domain alert monitoring, brute-force detection, malware and vulnerability tracking, severity classification, incident escalation, IP blocking, and real-time event simulation
  - **Tech Stack:** React.js, TypeScript, Vite, Tailwind CSS, shadcn/ui, Python
- **MODUS MAPPING – Intelligent Crime Pattern Analysis Platform** Sep 2025 - Sep 2025
  - Developed a crime-analysis platform for law enforcement to manage criminal records, visualize geographical crime patterns, and identify relationships between incidents to support investigation workflows.
  - **Tech Stack:** React, TypeScript, Supabase, Tailwind CSS, Lucide React, XLSX.

Certifications

- **Cybersecurity Professional Certification -** Google, Coursera -In Progress
- **Cybersecurity -** Infosys Springboard
- **Introduction to Python -** Infosys Springboard

Research and Publications

- **Conference: ICCCIoT 2026 – International Conference on Computing, Communication, and Internet of Things.**
- Presented research on an Android Device Policy Controller (DPC)-based security framework designed to mitigate unintended data exposure during physical device handovers.
- **Paper ID:** 309 | **Paper Title:** Zero-Trust Physical Handovers: A Low-Latency Android DPC Framework for Mitigating Unintended Data Exposure | **Presentation Date:** 24–25 September 2026 | **Venue:** Sri Sairam Engineering College, Chennai.

Achievements

- **Best Innovative Idea Award -** HACKZILLA 2k25 Hackathon (KPRIET) - **Modus Mapping**
- **2nd Prize -** VYASA 2K26 Event, ESEC.
- **Finalist -** BitNBuild'25 Hackathon (State Rounds), GDSC CRCE - **Modus Mapping**

Personal Details

- **Date of Birth:** 14/06/2004
- **Languages Known:** Tamil, English
- **Nationality:** Indian
- **Current Location:** Thoothukudi, Tamil Nadu
- **Willingness to Relocate:** Yes
